SUMMARY

Third-year CS student and former sysadmin (4+ years), now moving into software. Solo-built MonoTask, an Android app in Jetpack Compose with a Firebase backend and its own design system. Looking for a student developer role, 2–3 days/week, and planning to stay on after graduating.

EDUCATION

B.Sc. Computer Science **Nov 2024 – Sep 2027 (Expected)**
Afeka College of Engineering *Tel Aviv*

- GPA 90.9 (94.2 in 2nd year) · Scored 100 in Data Structures, Databases, ML, OOP and UI Development

PROJECTS

MonoTask ↗ | Kotlin, Jetpack Compose, Firebase, Hilt · **Demo Video ↗** **Feb 2026 – May 2026**

- Self-studied Compose for a gamified one-task-at-a-time app: 8 screens, 34-component design system
- Designed a hybrid architecture: extended MVVM with an MVI BaseViewModel enforcing a single State
- Used the app as my daily task manager while building it, so bugs and UX gaps surfaced in real use
- Modeled the task-picking algorithm: a logistic urgency curve weighted against importance and snoozes
- Streamed Firestore data to the UI as Flows; streak and weekly-XP stats update in one transaction
- Wrote 87 unit tests (JUnit 5, AssertK) for XP, achievements, task selection and undo/restore use cases

George The Vetrinator ↗ | Kotlin, XML Views, Coroutines, Sensors **Dec 2025 – Jan 2026**

- Created a pixel-art arcade game parodying the sitcom Haparlament, with a Google Maps leaderboard
- Smoothed tilt input with a low-pass filter and a neutral zone, so one tilt moves exactly one lane

WORK EXPERIENCE

Python Assignments Grader **Nov 2025 – Oct 2026**
Afeka College of Engineering

- Selected to grade Python assignments for all Introduction to CS courses: ~800 students over 3 semesters
- Built Python test scripts that pre-grade submissions on code structure and quality, not just output

Microsoft Support Engineer **Aug 2021 – Aug 2023**
We Ankor · IT infrastructure, cloud and security · Promoted from Helpdesk after 8 months

- Split a national payments company's domain and M365 tenant (100+ users), 6+ months, largely on-site
- Scripted AD, M365 and Azure user operations, server tasks and migration steps in PowerShell
- Led on-prem AD and Exchange migrations to M365 (hundreds of users each), directing client IT staff
- Handled tier-2 escalations and advised IT managers at 100+ client orgs on licensing and security

System Administrator **Aug 2018 – Apr 2021**
Israel Defense Forces · Combat Intelligence Battalion

- Ran AD accounts, endpoints, and network infrastructure for a 24/7 battalion (IDF sysadmin course: 97)

SKILLS

Languages & Tools | Kotlin, Java, Python, C, SQL, Bash · Git, Gradle, Docker, JUnit 5, AssertK
Android | Jetpack Compose, XML Views, Coroutines, Flow, Hilt, Navigation, DataStore, Material 3
Architecture & Data | Clean Architecture, MVVM/MVI, Firebase Auth, Firestore (NoSQL), PostgreSQL
IT & Cloud | Microsoft 365, Azure, Intune, Active Directory, Exchange, Group Policy, PowerShell
Spoken Languages | Hebrew (native), English (fluent)
